

HTD High Torque Drive Belt

HTD Synchronous Belt

Relative Power \uparrow 100%

Fenner® HTD timing belts are the first generation of metric curvilinear tooth form synchronous belts for high torque drives.

Benefits

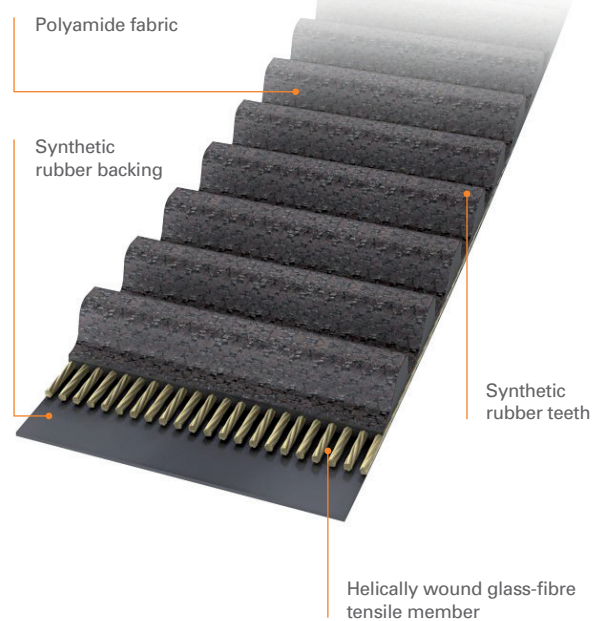

- > Curvilinear tooth improves stress distribution for higher tooth strength
- > Offers a more compact drive than classical timing belt drives
- > Fully approved by all international standards ISO 13050 (International Standards Organisation)
- > Ambient operating temperature -20°C to +100°C
- > Ozone-resistant

Size Reference

3mm	111 to 1569 mm	5mm	275 to 2000 mm
8mm	288 to 4400 mm	14mm	966 to 4578 mm

Construction
