

Fenner® CLASSIC Chain

British Standard (BS) and American ANSI Power Transmission Link Chain

Relative Power \pm 100%

Fenner® standard chain provides a cost effective solution for fit and forget reliability for everyday applications. Easy to fit and replace, our robust and long lasting chain consistently outperforms others time after time.

Benefits

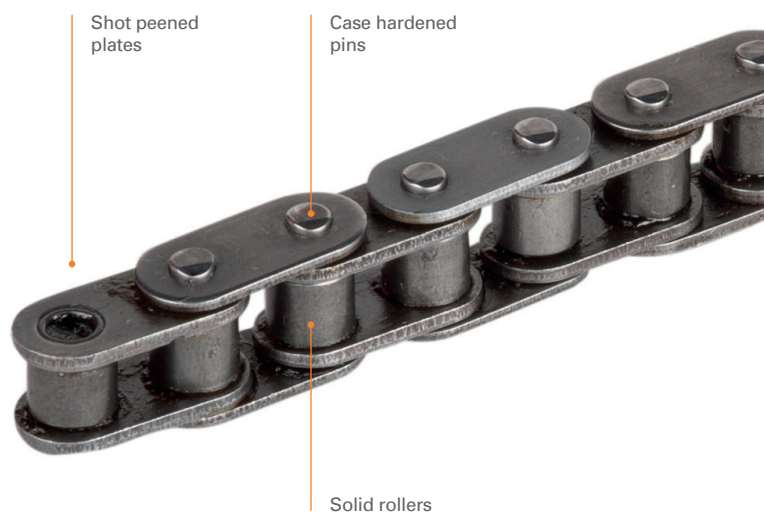

- > Shot peening of roller and side plates gives increased fatigue resistance
- > High waisted side plates increase effective cross section improving fatigue strength
- > Case hardened pins extend wear life
- > Solid rollers evenly distribute load and increase wear life
- > Seam orientated bushes ensure that seams are positioned away from critical bearing areas preloaded to bed-in all component parts
- > Stainless steel product available from stock

Size Reference

British Standard ISO 06B - 48B (3/8" to 3" pitch),
American Standard ANSI 40 - 240 (1/2" to 3" pitch),
Available in Simplex, Duplex and Triplex.
