

Trantorque GTR

Trantorque GTR

High Power, Critical Timing Solution

Trantorque GTR keyless bushing is the ideal solution for high power or critical timing applications. It offers a mechanical shrink-fit eliminating the problems of fretting corrosion, backlash and key wallowing.

Benefits

- > Locks and unlocks with the twist of just one nut
- > Precise radial and axial adjustment on shaft. Ideal for timing components
- > Trantorque GTR is "self-centering" unlike other cone clamping units. It needs no location diameter in components to retain concentricity
- > Repair of damaged keyways, just slip Trantorque GTR over the damaged keyway to effect repair
- > Eliminates keyways thereby reducing shaft costs. Also allows smaller shaft as the keyway does not weaken the shaft
- > Ambient operating temperature -34°C to +204°C

Size Reference

Bore Size in mm

184A0105 to 184P0175

5mm to 75mm

Construction

Locks and unlocks with the twist of just one nut

Self centering single nut design

Keyless bore
